

Copycat Invention: Animal adaptation

REPRODUCIBLE

1. Read *Copycat: Nature-Inspired Design Around the World*. Think about the special survival skills the plants and animals featured in the book have that were copied to create inventions to solve human problems.
2. In the space below, draw an animal you think is interesting.
3. In what type of habitat does your animal live? Label the parts of your animal that help it survive in its habitat. (For example, the beak, or the fur.)
4. Be a "copycat!" Draw an invention inspired by one of your animal's features.
5. How could your invention help people?
